vMix Live Production and Streaming Software

vMix is a professional-level video streaming suite that can record streams from high definition sources for services like Twitch and Youtube.

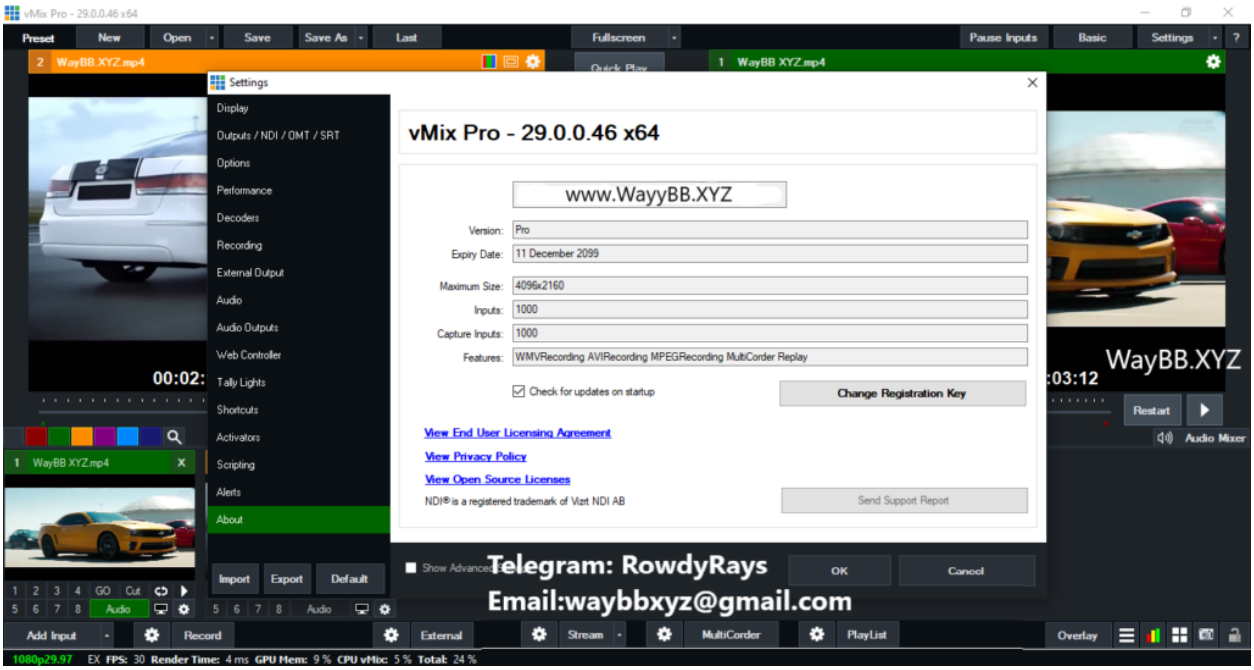
The program comes filled with high-quality features and has a clean and well-designed interface that makes streaming and apply effects to various input sources easy and painless vMix.

vMix supports a wide range of video formats and connected directly to online services that do streaming. It can work with virtually all types of still images and webcams as well as AVI, VOB, MKV, MP4 and other video formats. Standard audio inputs are naturally supported.

There is a wide array of effects that can be applied to a video stream or input source, mostly having to do with color correction, image adjustments, zooming, panning, cropping among others.

The number of options available from the vMix application are seemingly endless and there's little that they haven't given thought to. It's definitely a professional grade video editing suite that's well suited towards gamers and other online streamers.

vMix Live Production Download



vMix Produce, Record and Stream your own live events. Create professional productions in HD, SD and even 4K.

vMix is a Software Video Mixer and Switcher that utilises the latest advances in computer hardware to provide live HD video mixing, a task previously only possible on expensive dedicated hardware mixers. vMix also functions as live streaming software that allows you to publish your live productions directly to the Internet!

vMix runs on Windows 7, Windows 8 and Windows 10 platforms.

Please Note: vMix can NOT be installed directly on OSX and can ONLY be installed on Windows via Boot Camp when using a MAC
Boot Camp allows installation of Windows in a separate partition on the system. vMix uses Direct3D which is exclusive to Windows, no OSX version of vMix is available.

vMix is a complete live video production software solution with features including LIVE mixing, switching, recording and LIVE streaming of SD, full HD and 4K video sources including cameras, video files, DVDs, images, Powerpoint and much much more. Simply add your favorite capture device, either internally (PCIe) or externally (USB 3. or Thunderbolt) and you will be producing pro quality content in no time.

- **Features:**
    - All your inputs in one place
    - Video Cameras: 4K, HD and SD capable. Support for Webcams and capture cards. See Supported Hardware
    - NDI™: Send and receive high quality, low latency video and audio on the local network between vMix systems and any NDI compatible sources. See NDI

- Video Files - Support for all popular formats including AVI, MP4, H264, MPEG-2, WMV, MOV and MXF.
- DVDs - With menu navigation

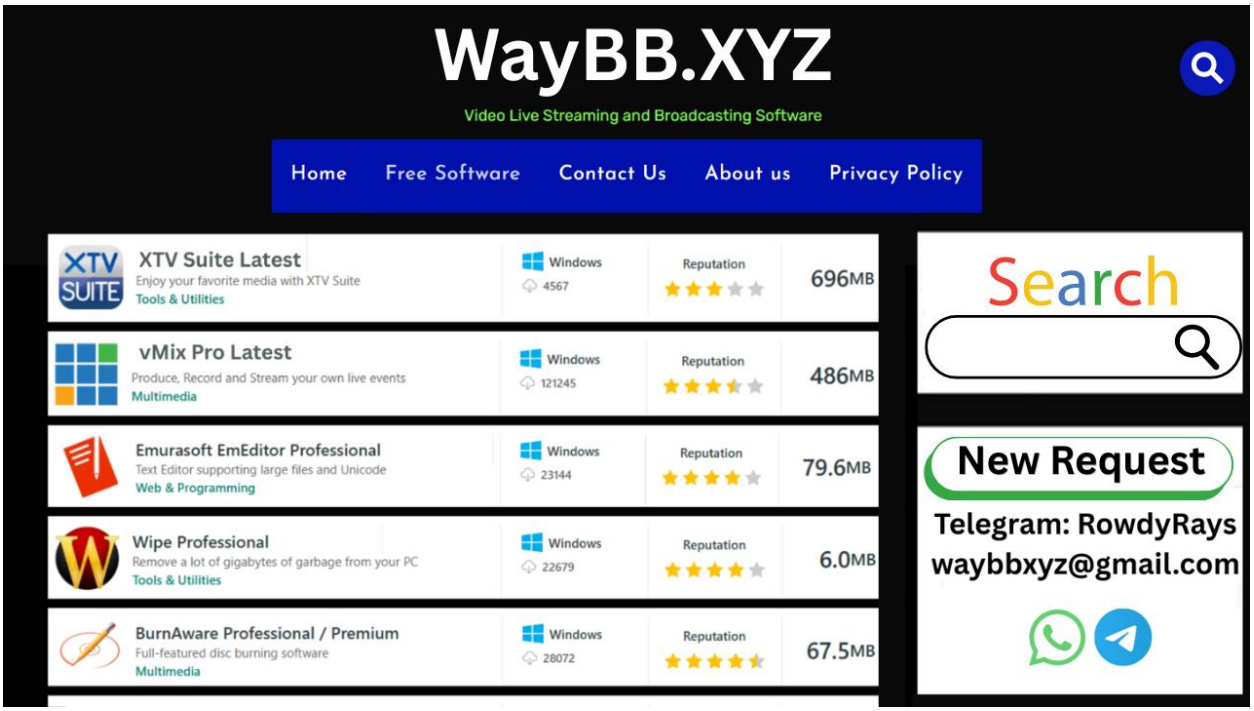
- Audio Mixer allows you to easily keep track of all audio sources and includes the ability to Mute, Follow (Auto Mixing) and Delay any source.

- A VU Meter is also included with a peaking display to ensure each inputs level is broadcast ready.
- Fine tune every audio source with built in EQ, Compressor and Noise Gate effects



Specifications:

- **System Requirements**
- Minimum Operating System: Windows 7 or higher / Recommended Operating System: Windows 10
- Minimum Processor: 2Ghz Dual-Core Processor / Recommended Processor: Intel Core i7 Processor 3Ghz+
- Minimum Memory: 1GB DDR2 / Recommended Memory: 8GB DDR3
- Minimum Hard Drive: 7200 RPM Hard Drive (for recordings) / Recommended Hard Drive: Solid State Disk
- Minimum Graphics Card: DirectX 10 Compatible / Recommended Graphics Card: Dedicated Nvidia Card with 1GB Memory
- Minimum Screen Resolution: 1280x720 / Recommended Screen Resolution: 1920x1080

Graphics Cards

- (All DirectX 10 Compatible graphics cards are supported. The speed of the graphics card will determine how many HD cameras, inputs and simultaneous recording, streaming and outputs are possible.)

Intel HD Graphics 4600 / 520:

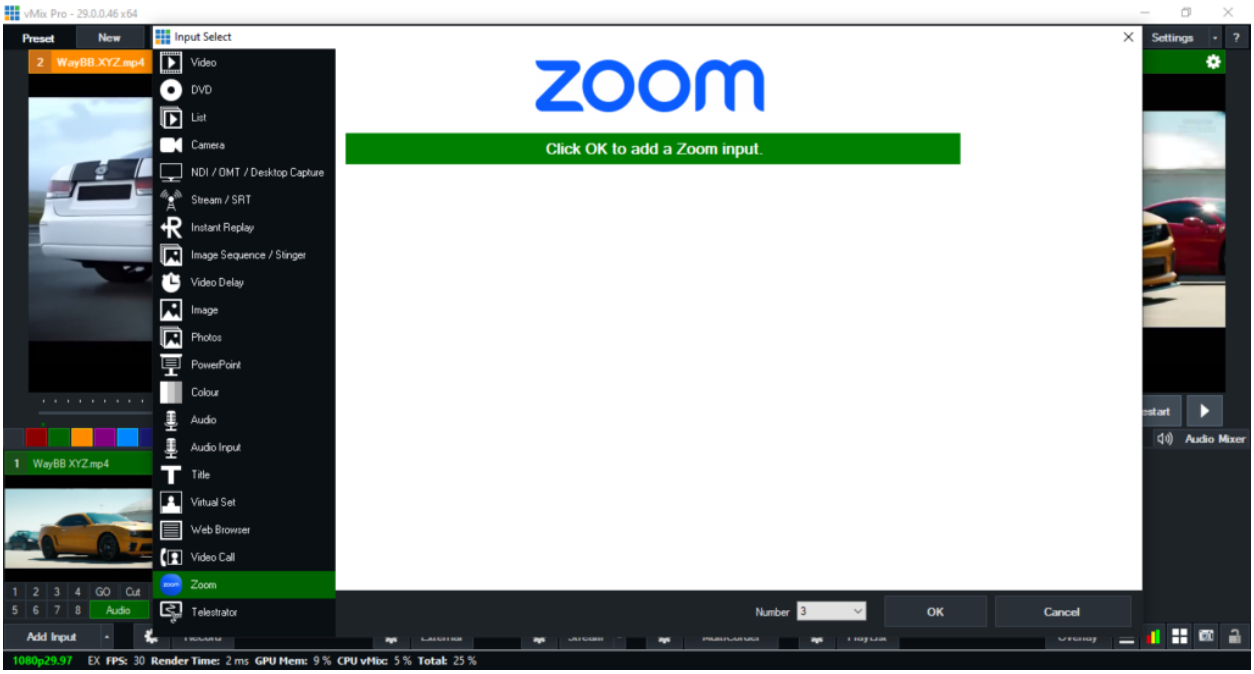
- HD Inputs: 2 Cameras + 4 Inputs / Outputs: 1080p recording or 720p recording + streaming

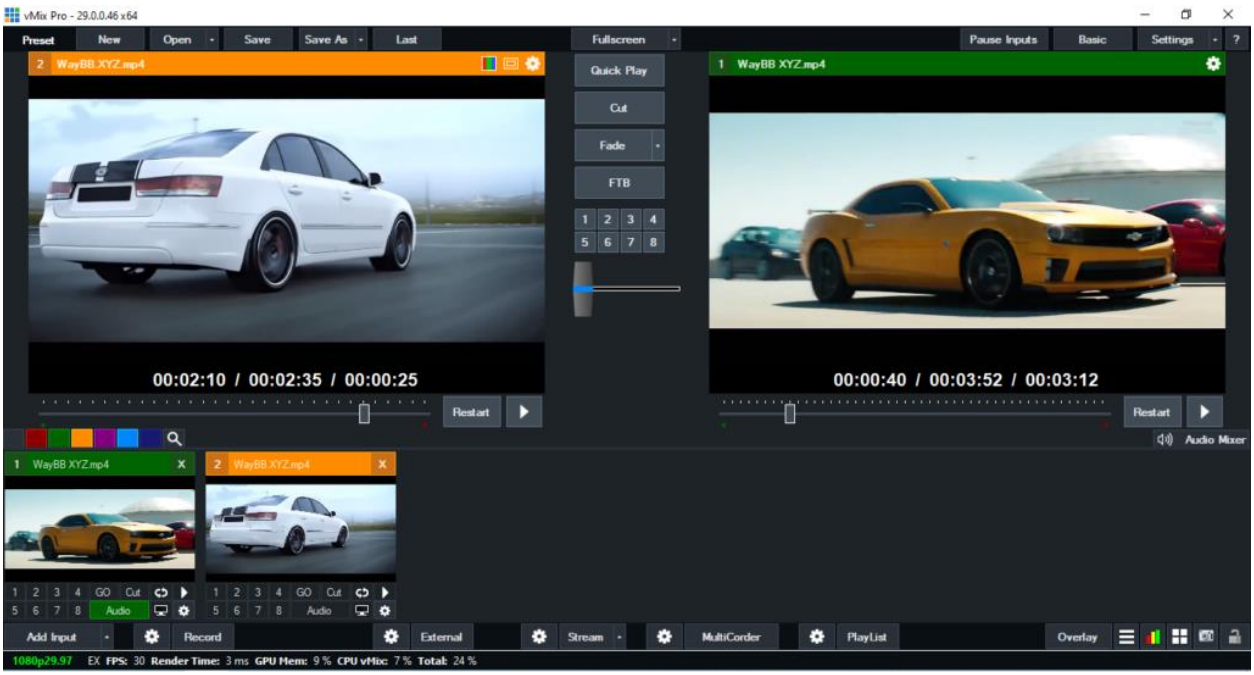
NVIDIA 750 / 950 / 1050:

- HD Inputs: 4 Cameras + 8 Inputs + Instant Replay / Outputs: 1080p recording and streaming

NVIDIA 960 / 1060:

- HD Inputs: 2 4K or 8 HD cameras + Instant Replay / Outputs: 1080p recording and streaming





Characteristics

- It merges various sources, such as cameras, video files, DVDs, and photos of vMix Pro.
- Produces broadcast-quality HD videos, with compatibility for up to 8 different cameras.
- It handles all audio and image files with precision and superior quality.
- It streams directly to platforms like YouTube, Facebook, and others.
- Use green screen technology along with the effects of your choice to produce a high-quality final product.
- It uses the latest technological innovations to ensure smooth, high-quality video production.

Requirements

Minimum Requirements

- **Operating System:** Windows 11 and window 10.
- **Processor:** Dual-Core, 2.0 GHz or higher.
- **RAM memory:** 4 GB of RAM.
- **Graphics Card:** DirectX 10.1 compatible (2010 model or newer).

- **Hard Drive Space:** 7200 RPM (or SSD).
- **Screen Resolution:** 1280×720.
- **Sound Card:** Windows compatible (recommended for live streaming).

Recommended Requirements

- **Operating System:** Windows 10 or higher.
- **Processor:** Quad-Core, 3.0 GHz or higher.
- **RAM memory:** 8 GB or more.
- **Graphics Card:** NVIDIA GeForce 1050 or higher (for 4K rendering).
- **Hard Drive Space:** SSD.
- **Screen Resolution:** 1920×1080 or higher.
- **Sound Card:** Professional sound card

How to install VMix Pro

- Download the VMix Pro 2026 installation file using the direct download button.
- Once downloaded, use WinRAR to extract the installation file.
- Open the unzipped folder and run the installation file to install vMix Full on your computer.
- After installation, open the folder containing the downloaded file, copy it and paste it into the installation box.
- Once the downloaded file has been copied,
- Your vMix Pro Full will be fully activated and ready to use.
